#### DETAILED ACTION

## Information Disclosure Statement

1. The information disclosure statement filed 07-21-2004 has been received and placed of record in the file.

## Allowable Subject Matter

2. Claims 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Reasons for allowance

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 5 and 6, the prior of record fail to teach, the repeaters of claim 4, securing the optimum communication state is selected base on information above reception condition of the antenna and bit error and echo signal of electronic wave between each repeater.

## Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 09/780,497

Art Unit: 2684

5. Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Ronald (U.S. Patent No. 5,880,867).

Regarding claim 3, Ronald teaches a vehicle compartment radio LAN system (see fig. 11, col. 15, lines 31-40) comprising; the repeater mounted in front and above of a plurality of seat rows (see figs. 11 and 12, col. 14, lines 32-38, and lines 62-64, col. 15, lines 1-18, lines, col. 16, lines 60-64, and col. 17, lines 3-15), and terminal positioned in one of the plurality of seat rows and configured to communicated through the repeater in same seat row by radio (see fig. 12, col. 17, lines 5-10),

#### Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ronald (U.S. Patent No. 5,880,867).

Regarding claim 4, Ronald teaches a vehicle compartment radio LAN system (see fig. 11, col. 15, lines 31-40), comprising a plurality of repeaters mounted in above each of a plurality of seat rows (see fig. 12, col. 16, lines 60 – col. 17, lines 15), and terminal positioned in one of the plurality of seat rows and configured to communicated through the repeaters in same seat row by radio (see fig. 12, col. 17, lines 5-10), the repeaters mounted in above of a plurality of

Art Unit: 2684

seat rows (see fig. 12). Ronald fails to disclose that the repeaters are mounted in each of a plurality of seat rows.

However, it would have been obvious to one of ordinary skill in the art at the time invention was made to modify Ronald system such that the repeaters are mounted in each of the plurality of seat rows, thereto in order to provide user the located in the seat may couple a portable computer to the network via own transceiver.

## Response to Arguments

8. Applicant's arguments with respect to claims 3-6 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

9. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 09/780,497

Art Unit: 2684

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Beierle (U.S. Patent No. 6,483,865) discloses wireless interface for electronic device located in enclosed spaces.

Miller (U.S. Pub. No. 20030009761) discloses mobile wireless local area network and related methods.

Gresham (U.S. Pub. No. 20020160773) discloses communications system for aircraft including wireless systems.

#### Conclusion

11. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Trinh whose telephone number is (703) 305-5622. The examiner can normally be reached on Monday-Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung, can be reached at (703) 308-7745.

Art Unit: 2684

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Technology Center 2600 Customer Service Office** whose telephone number is (703) 306-0377.

13. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
